President Feels It His Duty to Urge Care in Framing Anti-Alien Land Laws.

SACRAMENTO, Cal., April 19. - A egram to Gov. Johnson from Secregiving the views of the Federal Admit tration on the pending alien land laws in the California Legislature, was re-ceived to-day. Gov. Johnson made the telegram public, but without comment. It bears to-day's date and is as fol-

"The President desires me to say that, while he fully recognises the right of the people of California to legislate according to their judgment on the subject of land tenure, he feels it his duty to urge a recognition of the interna-tional character of such legislation.

"Being anxious to preserve and strengthen the long standing friendly relations existing between this country and the nations of the Orient, he very respectfully but most earnestly advises against the use of the words inate bill as telegraphed to the Depart-ment of State is greatly to be pre-ferred. WASHINGTON, April 19.—Secretary Bryan to-day telegraphed to Gov John-sen of California requesting him to withhold his eignature from any anti-land legislation passed by the Cali-fornia Legislature which might be in violation of treaties between the United States and Japan.

The postponement ey the Californa Legislature of the alien land bills until next week has the effect of slightly re-tieving the tension here, although every moment until the bills are again taken up will be utilised in exchange of message between Washington and Sacramento and other points in California where influential officials reside who may be able to exert some influence upon the course of legislation at the State capi-

interfering in the progress of legisla-tion in California they are privately addressing themselves to individuals to secure the amelioration of the features of the pending land bills offensive to the Japanese Government.

But, taking into consideration the probability that in its final form the legislation may not apply to other alleas than Japanese and Chinese, the admin-istration officials here are giving some thought to the best means of meeting a protest by the Japanese Government against the proposed legislation on the ground that it is in violation of treaty obligations.

While Seanter Root was Secretary of State he prepared a memorandum which related to the right of Japanese in the United States to own land for use for agricultural purposes, and his opinion was adverse to the staim.

The failure of the Japanese Government so far to issue a degree confirming the treaty right of Americans who own land in Japan may also be an important factor in the negotiations which may be expected to foliow the enactment of the California legislation. Altogether officials profess to find considerable material upon which to base a defense against a charge of non-observance of the treaty of 1858
